## DETAILED ACTION

### ***Information Disclosure Statement***

1. Acknowledgement is made of the Information Disclosure Statement filed September 2, 2003, which has been made record of and placed in the file.

### ***Pre-Amendment***

2. Acknowledgement is made of the Pre-Amendment filed September 2, 2003, which has been made record of and placed in the file.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 8-13 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No.

6,672,153 in view of Kobayashi et al. Both the '153 and the instant invention teach a system for maintaining after the internal combustion engine stopped, a heating resistor temperature at least equal to the temperature during operation of the internal

combustion engine until the temperature of the internal combustion engine has decreased below a generation temperature of volatile gas. However, '153 fails to teach a control unit. Kobayashi et al teaches a control unit (81). It would have been obvious to one of ordinary skill in the art at the time that the invention was made to have used the control unit of '023 in the measuring apparatus of the instant invention for the purpose of controlling the amount of fuel injection to an internal combustion engine (col. 16, lines 31-34, '023).
